

Digital Dictation Management

OLYMPUS

Your Vision, Our Future

A photograph of three business professionals (two men and one woman) in dark suits standing on a modern office balcony. They are leaning on a metal railing and appear to be in conversation. The background is a large, multi-story glass and steel building with a grid-like pattern of windows. The lighting is bright and natural, suggesting an indoor or well-lit outdoor setting.

Your time is the most valuable.

*It doesn't matter where your busy schedule takes you;
with Olympus Audio Systems professional recording has never
been easier. Best solutions fitting today's business needs.*

- Real-time recording with Olympus DSS Player software
- Crystal clear recording and playback in DSS format
- Pointing device for PC navigation with USB direct connection
- 2 programmable buttons via software

Direct Recording into the PC / MAC

The DR-1000 digital dictation device is connected to the PC via USB and comes with DSS Player software. It is operated using a central pointer which is also used for PC navigation. The stylish and ergonomically designed body incorporates features that ensure ease of use for both left and right handed users and the visually impaired. The outstanding quality microphone and speaker technology enables crystal clear recording in a wide range of settings and meeting formats giving perfect reproduction during playback. Because the DR-1000 records straight to a PC, there is no need to worry about storage capacity.

DR-1000

DSS-Player Software

DSS Player Software is the perfect tool for downloading and organising the playback of audio files on a computer. The software manages DSSPro, DSS, WAV, WMA, and MP3 audio files. For an easy transcription process the software features e.g. Author ID Setting, Intro Scan and Playback Speed Control. An upgrade to DSS Player Plus version will offer the opportunity to integrate voice recognition software and is available to download online. Please visit our website to download, and for compatibility information. www.olympus-europa.com

- Recording in Digital Speech Standard Pro (DSSPro)
- Ergonomically designed: Large backlit LCD, NEW button and three Smart Buttons
- Professional editing functions such as Insert or Overwrite dictation and Partial Erase
- SDHC card slot that allows almost endless recording capacity: e.g. over 157 hours recording with the supplied 1 GB SD Card
- Up to 5 folders for file management (holding max. 200 files each)

Flexible mobility and high-performance

This sleek and elegant digital voice recorder is specially designed for small enterprises. Up to 200 files can be saved in each of the five folders and an SDHC Card slot ensures ample storage capacity. Recordings are saved in the high-quality DSSPro format and users have the choice of various recording modes including the new extra-high-quality QP mode. Files can be downloaded quickly and easily to a PC or Mac via Hi-Speed USB and integrated in the office workflow thanks to the included DSS Player software.

Olympus Professional Dictation Systems also deliver enhanced workflow solutions for medium and large enterprises. Please visit the Olympus website for more information. www.olympusproline.co.uk

AS-2400

For dedicated transcription needs, Olympus offers the optional AS-2400 Transcription Kit which includes a footswitch and headset for hands-free operation. The AS-2400 guarantees easy transcriptions of any DSSPro recordings. Data can be labelled according to importance or priority and files can be viewed at any time. It allows easy transfer from the voice recorder to the secretary's office. Besides the DSS Player Standard Transcription Module, the kit also includes the RS-28 footswitch and the E-102 stereo headset to make hands-free operation of the DS-2400 possible.

AS-2400

- Ideal for meetings, conferences and lectures
- Latest sound enhancement technology
- High end microphones
- Allows high-quality stereo and PCM recording
- Durable, lightweight design with seamless compatibility

Conference solutions

For meetings, conferences and concerts, with the ME-30W Conference Kit, it is easier than ever to capture sounds in large gatherings, all in high quality stereo. This professional solution includes two omni-directional microphones engineered by Olympus for seamless compatibility. With 360° coverage, you'll never miss a contribution – no matter where the speaker is sitting. The ME-30W Conference Kit is compatible with Olympus Digital Voice Recorders which have a stereo function, particularly recommended for use with the PCM Recording format. For detailed information please visit Olympus website. www.olympus-europa.com

High Quality Audio Processing

The Olympus high end range of stereo recorders are primarily aimed at business users and anyone who needs the very latest technology in audio processing. With these state-of-the-art devices and their unbeatable stereo sound quality, meetings, personal notes and lectures can be captured and reviewed with outstanding quality and ease. Microphone zoom functions and adequate sensitivity modes for different business situations make them ideal for capturing every little detail. So you will never miss a valuable contribution. For detailed information please visit Olympus website. www.olympus-europa.com
